

**DURABLE DOORWAY** The Rite Door integrated system features preinstalled hardware that meets fire codes, is quick and easy to install and combines durability and style suitable for high-traffic areas and demanding openings. The product is available in a variety of finishes and meets all ADA-accessibility guidelines.

Adams Rite Manufacturing • [www.adamsrite.com](http://www.adamsrite.com)

**CLEAN MACHINE** The Sanosil Halo Fogging System produces a mist of ionized particles for infection and microorganism control to reach hard-to-clean areas such as around doors, behind window treatments and under beds. The system will kill 99.99 percent of bacteria, viruses and fungi on precleaned surfaces without harming sensitive materials or equipment.

Med Effect Inc. • [www.medeffect360.com](http://www.medeffect360.com)

**PATIENT PROTECTION** The company offers a free sample of its Fall Fighter fall management products, which include a string monitor, bed and chair monitors and a variety of durable, universal sensor pads. The bed monitor includes a nurse call interface jack, optional AC adapter input and remote-only volume option to silence the room alarm.

Crest Healthcare Supply • [www.cresthealthcare.com](http://www.cresthealthcare.com)

**STURDY SYSTEM** The CleanMount is the first crevice-free display and keyboard mounting system that also provides an industrial-strength, ergonomic, PC-based solution. All cabling is concealed inside the unit itself, and the smooth exterior surface is free of crevices and sharp corners to make cleaning easy.

**CLEAR MESSAGE** The new EECLA-R fixture features an exit sign with two adjustable emergency lights that can be positioned at the top of the sign or realigned to either side. Constructed from heavy-duty, impact-resistant thermoplastic, the unit includes two 5.4-watt DC 5 wedge-based incandescent lamps in the emergency light and a 1-watt LED lamp in the sign for energy savings.

## Dealing with and Managing Through Change

### Program Highlights:

-  • **Joint Commission Update** featuring George D. Mills, FASHE, CEM
-  • **Code and Standards Panel** moderated by Chad Beebe, AIA, CHFM, SCFPS, CBO, SASHE
-  • **Update on the Restoration of the Joplin/Mercy Health Care Campus** with Ken Cates, SASHE

49th ASHE Annual Conference & Technical Exhibition  
July 15-18, 2012 • San Antonio

**CLOSE WATCH** The fire alarm monitoring system simplifies the management and maintenance of multiple fire alarms and speeds response to emergencies. The IFP-NET-3 displays detailed, floor-by-floor layouts of protected facilities and their fire alarm systems. Up to 200 fire alarms can be tied together using an existing Ethernet — no extra fiber or wire is needed.

**Honeywell Fire Systems**  
[www.farenhyt.com](http://www.farenhyt.com)

**OPEN WINDOW** TrueInsight Remote Service, an Internet-based software platform that offers remote diagnostics, provides an electronic window into the operation of the Simplex fire alarm system 24 hours a day, seven days a week. The software can help users manage their systems more efficiently and cost effectively.

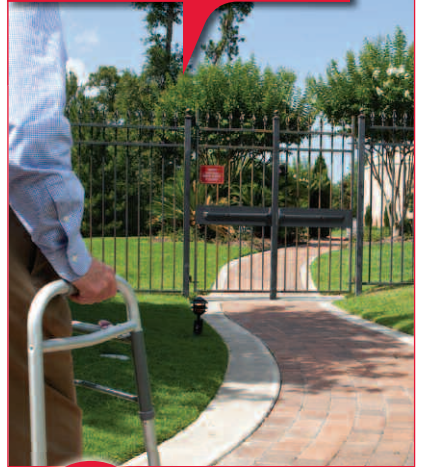

**SimplexGrinnell**  
[www.simplexgrinnell.com](http://www.simplexgrinnell.com)

**SIMPLY SAFE** The new Cerberus PRO and Desigo Fire Safety portfolios feature advanced fire system panels and smoke detectors for small- to mid-size applications. The systems offer a complete range of panels, detectors and peripheral devices. Components have been engineered for interoperability to simplify optimization.

## Detex Works Here.

### Outdoor Area System

## Panic hardware for gated courtyards and gardens.

Exclusive to Detex, our weatherized panic hardware system is ideal for protecting residents or patients who spend time in a secured outdoor area. Especially useful for assisted living facilities, our Outdoor Area System hardware makes sure that residents can't wander beyond the gate. Advantex® quality components are extremely durable.

- **Weatherized Panic Devices** with delayed unlocking have a 15-second alarm that notifies monitoring station of attempted exit.
- **Access Control Devices** allow entry with keypad or card reader.
- **Weatherized Door-Propped Alarms** warn that a door or gate is being held open.

**DUAL FUEL SOURCE** The generators start on diesel fuel and add natural gas as load is applied. Because natural gas is the predominant fuel, on-site fuel storage can be reduced. If the natural gas supply is interrupted, the generator switches to 100 percent diesel without any power drop during the transition.

Generac Power Systems • [www.generac.com](http://www.generac.com)

**RELIABLE BACKUP**

The 3,250 kw Series 4000 generator sets are available with fully redundant starting components, including dual starters, battery sets and battery chargers. The dual starting systems eliminate single points of failure and ensure the generator will start and assume full load in less than 10 seconds to meet NFPA 110.

MTU Onsite Energy  
[www.mtu-online.com](http://www.mtu-online.com)

**HANDY SOLUTION** The Track Busway system offers one-handed operation to add or remove outlet boxes or drop cords quickly and easily without cutting off power to the entire busway. It also features one soldered connection that increases savings with reduced parts, long product life and fewer failure points.

Universal Electric Corp.  
[www.uecorp.com](http://www.uecorp.com)

**SWITCH HITTER** New medium-voltage circuit breaker-type transfer switches and bypass/isolation switches are UL tested, listed and labeled under UL 1008A for use in emergency power systems. The switches transfer electrical loads between normal and emergency power sources through the carefully controlled opening and closing of circuit breakers.
