PICTURE THIS The distributor offers RCA high-definition LED TVs with screens ranging from 22 inches to 55 inches; the 22-inch screen has the widest viewing angle on the market. The units are thin, lightweight and energy-efficient, using 30 watts of power. The TV comes with a two-year exchange warranty and getting a replacement, if necessary, only takes a call to the RCA tech line.

ALARMING BY DESIGN

The patented, delayed egress/latch retraction device integrates both functions in one unit. For authorized personnel, the latch retraction operates with the access control system to allow exit and entry without sounding the 100dB alarm built into the device. Unauthorized entry triggers the alarm and keeps the door locked for 15 seconds so that staff can respond.

SAFE AND SECURE

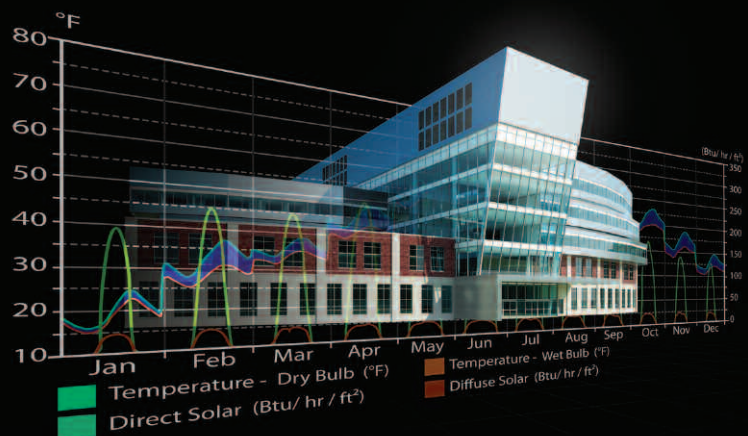

The CL3100 Series Grade 1 lever lock is designed for hospitals and health care facilities. Construction features true interlocking between the lock body and latch for added strength and durability. The series fits standard 161 door preps, making it suited for retrofits and new installations. It is available in 11 architectural hardware finishes.

Design, Build, and Operate Higher Performing Healthcare Facilities

Autodesk® Building Information Modeling solutions can help provide powerful insight into the design, construction, and operation of healthcare buildings.

Complete projects faster, more cost-effectively, and with reduced environmental impact using Autodesk BIM solutions for Healthcare.

SPECIAL SECURITY The electrified patient safety lever for behavioral health care features a lockset that can be hardwired into an access control system. The bidirectional lever can be electrically unlocked and locked and offers optional signaling choices such as request to exit. An optional monitoring system is available.

KEY CONTROL

Remote key programming administration is offered through remote wall programming devices. The devices allow administrators of Web-hosted systems to program, audit and schedule key expirations without recalling them from the key holder. Communication is conducted through a secure Web server or standard Internet connection.
