

OVER THE TOP American made and grown on local, independent farms, the green roof system utilizes pre-vegetated mats based on German technology. The other components include a lightweight growing medium, retention fleece, drain mat and roof barrier. **Xero Flor America • www.xeroflora.com**

SURFACE SOLUTION

Harmony paint promotes better indoor air quality by reducing airborne concentrations of volatile organic compounds such as formaldehyde. It delivers a durable finish that can withstand frequent washings and features antimicrobial properties that inhibit mildew.

QUICK DRY The Airblade V hand dryer is 60 percent smaller than the original, yet dries hands fast. Two sheets of unheated high-velocity air angled at 115 degrees span the width of each hand and dry hands in 12 seconds. The unit features a brushless DC motor with digital pulse technology for fast acceleration.

VERSATILE SYSTEM The Ocularis video management system enables streaming, recording and managing an unlimited number of cameras. Automatic camera licensing enables a system administrator to connect and replace cameras — which are immediately fully operational — whenever convenient. **OnSSI • www.onssi.com**

UPGRADE OPTION ESV4 offers new features and advanced technologies like HDMI output in 1080p high-definition video, simultaneous recording of four megapixel IP cameras, mobile app support and free video management software. The system is an option for facilities seeking to migrate from legacy analog systems to IP video surveillance.

SIMPLE STRATEGY One Container pharmaceutical waste program enables clinicians to dispose of both hazardous and nonhazardous pharmaceutical wastes in a single container. Eliminating waste segregation reduces the risk of noncompliance with the Resource Conservation and Recovery Act rules.

Clean Harbors www.cleanharbors.com

REDUCING RISK

Pharmaceutical waste compliance service utilizes a reusable 8-gallon, trap-top, locking-wire, step-on dolly pharmaceutical waste container. The service helps hospitals comply with regulations, minimize risk and maximize sustainability. Reusable containers are available for non-hazardous and hazardous waste.

Stericycle
