HEALTHY OPTION A new line of switches and wallplates made with Environmental Protection Agency-registered CuVerro antimicrobial copper surfaces include a toggle switch option. Testing shows that with regular cleaning the surfaces deliver continuous and ongoing antibacterial action, effective in killing greater than 99.9 percent of bacteria within two hours.

BUILT TO LAST The M•Dura bedpan washer is built with a durable, solid-brass body and a chrome finish that can handle the harshest cleaners. Designed with the help of nurses, the spray face is extended to include a rounded lift handle for both safety and ease of movement. An optimized spray force and concentrated spray pattern allow for bedpan washing without splash-back.

KEY TECHNOLOGY The electronic key tether (ekt) helps stop the loss of keys before it happens. Each ekt has a key unit and belt unit that are married by a unique radio-frequency signal generator. When the key unit becomes separated from the belt unit (worn by the user) by more than 10 to 15 steps, alarms are immediately triggered.
